

The HARMONY Big Data Platform

Transforming High Quality Data into Meaningful evidence for Blood Cancer.
A powerful and innovative approach to create high volumes of unique data.

FOCUS BLOOD CANCERS

- Acute Leukemias**
 - ALL
 - AML
 - Childhood HM's
- Chronic Leukemias**
 - CML
 - CLL
 - MDS
 - MPN
 - PV
 - ET
 - Myelo-fibrosis
- Lymphomas**
 - NHL
 - HL
- Monoclonal Gammopathies**
 - MM
 - WM
 - Amyloidosis

DATA PROVIDERS

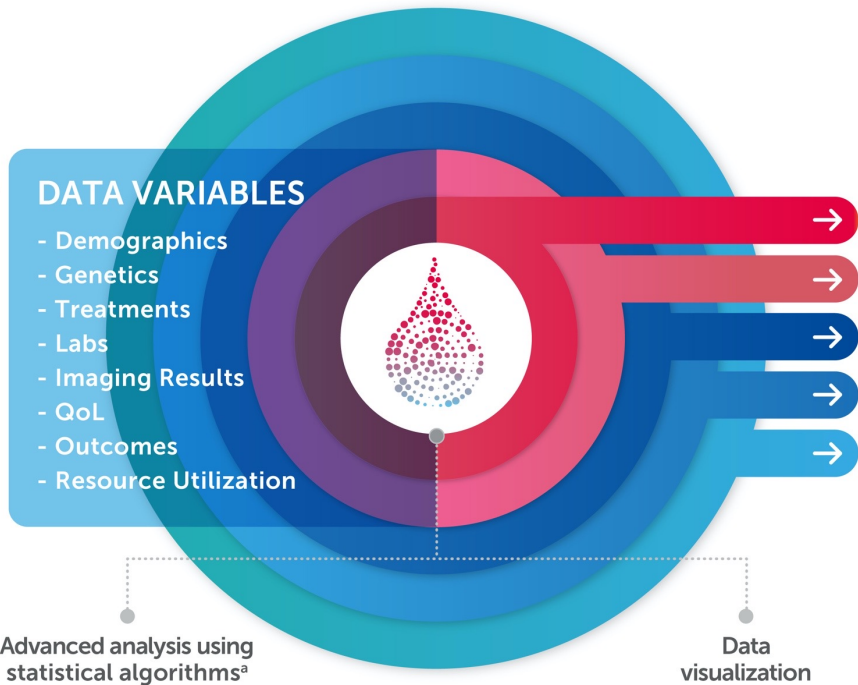

Partners and Associated members

- DATA SOURCES
- Hospitals
 - Interventional and non-interventional trials
 - Biobanks
 - Pharma

FULL PROJECT RESEARCH

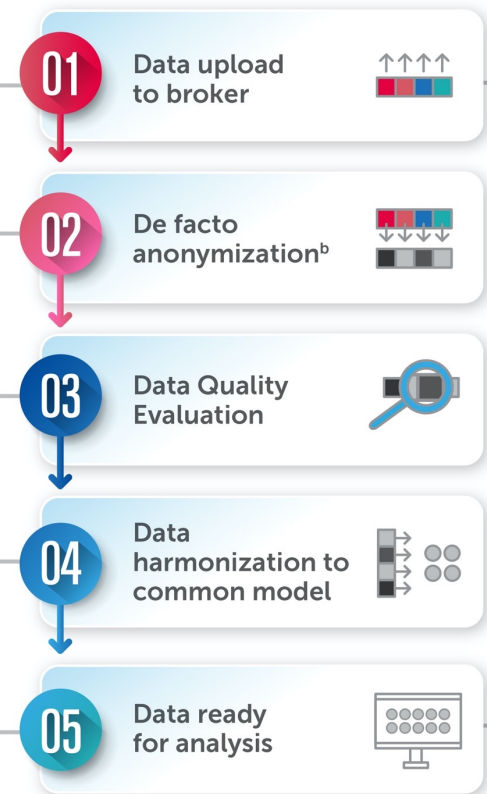

HARMONY BIG DATA PLATFORM

DATA PROCESSING

^a Only data essential to the analysis are accessible (to a limited group of users during a specific time span)
^b Data anonymization process is ISO 27001 certified

BIG DATA PLATFORM ANALYTICS

CURRENT AND UPCOMING PROJECTS

- Project Research publications
- New Research Projects
- Harmonization of Outcomes
- Guidelines
- Speed up drug development
- Increase application of omics data in clinical practice
- Additional safety signals
- Patient journey and disease knowledge
