Participate in the HARMONY-EBMT joint session (JS01)
about Big Data innovations for marrow transplant professionals
24 April 2023, 09:00 - 10:15 hrs.

Big Data innovations for bone marrow transplant professionals

Big Data innovations can support bone marrow transplant professionals and hematologists in selecting the best treatment for their patients. In the past six years, the HARMONY Alliance has built a research infrastructure that facilitates state-of-the-art Big Data research projects in blood cancer.

HARMONY invites bone marrow transplant professionals to become involved and submit research proposals that utilize this infrastructure to improve the treatment of blood cancer patients.

Participate in the HARMONY-EBMT Joint session

Date/time: Monday 24 April 2023 from 09.00 - 10.15 hrs.
Session nr: JS01

Theme: Learn about the new 'tools' to rapidly select the most promising treatment for blood cancer patients. Become involved in EBMT-HARMONY novel transplant studies using big data analytics.

The HARMONY Alliance is a public-private European Network of Excellence for Big Data in Hematology. Our mission is to unlock and spread valuable knowledge on hematologic malignancies (blood cancers) among a large number of stakeholders, with the goal to harness and mine Big Data to speed up the development of improved treatments for patients and more effective treatment strategies.

The HARMONY Alliance consists of two projects funded through the Innovative Medicines Initiative (as of 2022 called IMI, Innovative Health Initiative): HARMONY and HARMONY PLUS. Funding is received from the IMI 2 Joint Undertaking and is listed under grant agreement for HARMONY No. 116026 and grant agreement for HARMONY PLUS No. 945406. This Joint Undertaking receives support from the European Union's Horizon 2020 Research and Innovation Programme and the European Federation of Pharmaceutical Industries and Associations (EFPIA)
