After one year of work, we assume most attendees will be familiar with the project. Have you identified any unmet needs in one of our HM pillars? Learn how to get involved in our bench-to-bedside projects and how you can contribute with your data. Get updated on the AML and CLL pilot projects. If you weren't able to attend our Workshop in November on the Definition of Meaningful Outcomes for HMs, don't miss this opportunity to learn about HARMONY's plans to define meaningful outcomes measures for HM in partnership with all stakeholders.
